Art Unit: 2816

DETAILED ACTION

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

Claim Rejections - 35 USC § 112

Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, the recitation "the substantial cancellation" on line 15 lacks clear antecedent basis. The same is true for claims 12, 19 and 29.

The remaining claims are dependent from the above claims and therefore also considered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-13, 15-25 and 27-29 are rejected under 35 USC 102 (b) as being anticipated by Fikart et al (US 5,434,522) in view of Satoru (JP362176308).

Fikar et al discloses in Figure 1 a frequency doubler circuit comprising:

Application/Control Number: 10/602,353

Art Unit: 2816

- a full wave rectifier circuit (14); and

- a differential amplifier stage (42) coupled to the rectifier for generating an output signal including a desired output harmonic having a frequency that is double the first frequency, wherein the summing results in the substantial cancellation of unwanted output harmonics in the output signal.

Page 3

However, Fikart et al does not disclose that the rectifier stage comprising a first rectifier stage and a second rectifier stage.

Satoru teaches in Figure 1 a frequency doubler circuit comprising a phase shifting circuit (8, 9) for providing a first signal to a first rectifier (16) and an offset phase signal to a second rectifier (17) for providing an excellent wide band characteristic, see Constitution.

It would have been obvious to a person having skill in the art at the time the invention was made to employ the phase shifter circuit and the rectifier stages taught by Satoru in the circuit of Fikart et al for the purpose of providing an excellent wide band characteristic and easily fabricated on an integrated circuit.

Noted that, since the amplifier (42) of Fikart et al subtracts the even harmonic components and adds the odd harmonic component together; obviously, the even harmonic would be cut down depending upon the phase shift between the rectified signals applied to the input terminals of the amplifier. Thus, adjusting the phase shift of the rectified signals to achieve 20 dBc attenuation for the even harmonics or 40 dBc for unwanted harmonic would have been obvious and is considered to be matter of a design expedient for an engineer.

Allowable Subject Matter

Art Unit: 2816

Claims 8, 14 and 26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. The claims are allowable because the prior art of record does not show the phase offset of 90 degrees.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DINH T. LE whose telephone number is (571) 272-1745. The examiner can normally be reached on Monday-Friday (8AM-7PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIMOTHY CALLAHAN can be reached at (571) 272-1740.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
